Hiring Team
i1 Solutions

Dear Hiring Team,

I am writing to express my interest in the Systems Development Learnership (NQF Level 4) at i1 Solutions. As a passionate and motivated IT student with a strong foundation in programming, databases, and systems development, I am eager to combine classroom learning with hands-on experience in a real-world business environment.

Through my studies in Information Technology at North-West University, I have developed a solid understanding of system design, data management, and software development principles. I have also completed several academic and personal projects that strengthened my analytical thinking, teamwork, and problem-solving abilities — qualities I believe align well with i1 Solutions' focus on integration, data, business automation, and solution delivery.

What excites me most about this learnership is the opportunity to learn from industry experts while contributing meaningfully to real business challenges. I'm particularly drawn to i1 Solutions' hands-on, practical approach to learning and your commitment to preparing learners for a fast-evolving IT industry.

I am confident that my enthusiasm for technology, willingness to learn, and ability to adapt make me a strong fit for this program. I would be honored to be part of a team that values innovation, continuous growth, and collaboration.

Thank you for considering my application. I look forward to the opportunity to contribute to i1 Solutions and further develop my skills through this learnership.

Kind regards,
Sphesihle Sikhosana
