Dear Veritech Limited Hiring Team,

I am writing to express my keen interest in the Intern Software Engineer - Full-stack position at Veritech Limited. As I am currently in the final semester of my final year studying a Bachelor's degree in Information Technology, I am on track to graduate well before your January 2026 deadline and am excited by the prospect of beginning my career with a dynamic and competitive team like yours.

Throughout my degree, I have built a strong theoretical and practical foundation in algorithms, data structures, and complexity analysis. This knowledge is demonstrated in my personal projects, including a [mention one specific project, e.g., "a full-stack task management application"] that I designed and built from the ground up. This project involved frontend development, backend logic, and comprehensive database design, providing me with end-to-end experience in the software development lifecycle.

While I have solid experience with JavaScript and React, I am particularly drawn to this role because of your use of Golang. I have begun self-studying the language and am impressed by its performance and simplicity. I am a dedicated and fast learner, confident that I can quickly become a productive member of your team and contribute to your technology stack.

My resume, which provides further detail on my academic achievements and project work, is attached for your consideration. Thank you for your time. I am eager to discuss how my skills and immediate availability can be an asset to Veritech Limited.

Sincerely,

Sphesihle Sikhosana
